task2-1

- please modity the location `private static final String JAR_PATH = "/Users/carpewang/IdeaProjects/hw4/src/main/guessnumber.jar";`

task2-2

- the final result i using

```
if (!hasOutlier) {
            System.out.println("\n✅ All numbers fall within ±50% of each other.
Distribution seems uniform.");
        } else {
            System.out.println("\n❌ Some numbers deviate more than ±50% from others.
Distribution may not be uniform.");
        }
```

- if the output is ✅ `All numbers fall within ±50% of each other. Distribution seems uniform.` This is mean all of the number are within +50%/-50%

- but if the output is ❌ `Some numbers deviate more than ±50% from others. Distribution may not be uniform.` this is mean there are some number not within +50%/-50%.
